Experience

Freelance, Designer & Developer

July 2017 to present

Working on client projects involving product design and development.
Currently working with Vue, Node, AWS and the Amazon Product API.

Thinkful, UX Mentor

November 2016 to present

Mentor students in the UX and Frontend course. I help students learn through examples, assignments and encouragement.

EmployStream, Software Developer

November 2015 to July 2017

Continuously integrated features into EmployStream, a SaaS app that automates the hiring process. Built on Angular and Php, we had over 200,000 users at the time of my departure.

Web Machine, Developer and Co-Founder

August 2012 to November 2017

Designed custom WordPress websites for clients using modern web technologies. Work mostly with Php, Node, SCSS and Sketch.

Fathom, Web Developer

November 2014 to September 2015

Worked closely with clients to design and develop high-traffic websites. Worked with Php, SCSS and Adobe Creative Cloud.

Side Projects

Blouse, blouse.garybunofsky.com

Blouse is a collection of simple, subtle icons. Install with npm install blouse.

Tiny Notes, tinynot.es

Tiny Notes is a note taking app that allows you to share in .json format.

Lease Lightning, leaselightning.com

Lease Lightning is a fast way to send lease agreements to residents. Please note that this is a work in progress.
