

## Introduction

My name is Gary Bunofsky. I'm a designer and developer with a love for systems, typography, and applications. I enjoy designing user interfaces and writing clean, sustainable code.

## Professional Experience

### EmployStream, Software Developer

November 2015 – Present

EmployStream is a SaaS that automates the hiring process. I work with a team of developers to continuously integrate features into our codebase. I'm currently focused on enhancing user experience and on-boarding.

### Fathom, Web Developer

November 2014 – October 2015

Designed and developed high-traffic websites for universities and academic institutions. The primary goal was to convert visitors. Worked closely with clients and marketing specialists.

### Web Machine, Developer & Co-Founder

August 2012 – Present

We use an Agile approach to build and maintain web solutions. These range from website and brand redesigns to Salesforce migrations.

### American Red Cross, Design Intern

May 2011 – August 2011

I designed marketing collateral. I also coded and launched targeted email campaigns.

### Kent State University, Designer

January 2010 – May 2012

During my time at Kent State I worked closely with project managers to design web and print advertisements for clients.

## Projects

### Veronica (321)-233-9118

Veronica is an SMS chatbot. She can tell you today's news, tomorrow's weather, and plenty of other things. Veronica can be reached at (321)-233-9118.

### Magenda [magenda.co](http://magenda.co)

I wanted to create a to-do app with no download required. Thus, I developed Magenda, a browser-based list builder.

### WSM [iswestsidemarketopen.com](http://iswestsidemarketopen.com)

Remembering West Side Market's hours is difficult. Therefore, I helped create [iswestsidemarketopen.com](http://iswestsidemarketopen.com).

### Pass.js [garybunofsky.github.io/pass.js](http://garybunofsky.github.io/pass.js)

I wrote Pass.js to help analyze conversion funnels. Pass captures URL parameters such as `utm_source` through hidden form fields. It's very small and easy to install.

## Skills and Technologies

Design with a focus on applications, typography and systems; proficient in HTML, CSS, LESS, SCSS, PHP, Ruby, Rails, Command line, Javascript/Angular; SQL and Postgres; full-stack development; API integrations; Git SCM; Agile, TDD and continuous integration; responsive frameworks; Vagrant; Sketch; Adobe CC; Google Analytics Certified.

## Education

Bachelor of Arts Communication Studies

Kent State University

August 2008 – August 2012
