Gary Bunofsky   **Résumé**

Introduction

My name is Gary Bunofsky. I am a designer and developer who enjoys building applications, websites, and products.

Professional Experience

EmployStream, Software Developer

November 2015 – Present | Cleveland, Ohio

EmployStream is a SaaS that automates the hiring process. I work with a team of developers to continuously integrate features into our codebase. I'm currently focused on enhancing user experience and on-boarding.

Thinkful, UX Mentor

November 2016 – Present | Remote

Mentored students that were enrolled in Thinkful's User Experience Design course. Sessions consisted of weekly video calls. Taught students the fundamentals of UX.

Web Machine, Developer & Co-Founder

August 2012 – Present | Remote

We use an Agile approach to build and maintain web solutions. These range from website and brand redesigns to SalesForce migrations.

Fathom, Web Developer

November 2014 – October 2015 | Cleveland, Ohio & Remote

Designed and developed high-traffic sites and landing pages. The primary goal was to convert visitors. Worked closely with clients and marketing specialists.

Kent State University, Designer

January 2010 – May 2012 | Kent, Ohio

During my time at Kent State I worked closely with project managers to design web and print ads for clients.

Projects

Lease Lightning leaselightning.com

Lease Lightning is a super fast way to send lease agreements to prospective residents. Once a lease is sent, the potential renter can then digitally sign the lease from any device. Please note that this is a work in progress

Veronica (321)-233-9118

Veronica is a chatbot that can send you news from various sources. For instance, if you want the news from CNN, just text her CNN. You can text Veronica at (321)-233-9118.

Pass.js github.com/garybunofsky/pass.js

I wrote Pass.js to help analyze conversion funnels. Pass captures URL parameters such as utm_source through hidden form fields. It's very small and easy to install.

Magenda magenda.co

Magenda is a light, browser-based to-do list. A quick, simple way to log items – no download required.

Skills and Technologies

HTML, CSS, LESS, SCSS, PHP, Javascript, Ruby, Rails, Angular, React.js, Command line, SQL, Postgres, Git, APIs, TDD, responsive frameworks, Sketch, Adobe CC, Vagrant.

Education

Bachelor of Arts Communication Studies

Kent State University

August 2008 – August 2012
