Introduction

My name is Gary Bunofsky. I'm a designer and developer with a love for systems, typography, and applications. I enjoy designing user interfaces and writing clean, sustainable code.

Professional Experience

EmployStream, Software Developer

November 2015 – Present

EmployStream is a SaaS that automates the hiring process. I work with a team of developers to continuously integrate features into our codebase. I'm currently focused on enhancing user experience and on-boarding.

Fathom, Web Developer

November 2014 – October 2015

Designed and developed high-traffic websites for universities and academic institutions. The primary goal was to convert visitors. Worked closely with clients and marketing specialists.

Web Machine, Developer & Co-Founder

August 2012 – Present

We use an Agile approach to build and maintain web solutions. These range from website and brand redesigns to SalesForce migrations.

American Red Cross, Design Intern

May 2011 – August 2011

I designed marketing collateral. I also coded and launched targeted email campaigns.

Kent State University, Designer

January 2010 – May 2012

During my time at Kent State I worked closely with project managers to design web and print advertisements for clients.

Projects

Lease Lightning leaselightning.com

Lease Lightning is a super fast way to send lease agreements to prospective residents. Once a lease is sent, the potential renter can then digitally sign the lease from any device. Please note that this is a work in progress

Veronica (321)-233-9118

Veronica is a chatbot that can send you news from various sources. For instance, if you want the news from CNN, just text her CNN. You can text Veronica at (321)-233-9118.

Pass.js garybunofsky.github.io/pass.js

I wrote Pass.js to help analyze conversion funnels. Pass captures URL parameters such as utm_source through hidden form fields. It's very small and easy to install.

Magenda magenda.co

Magenda is a light, browser-based to-do list. A quick, simple way to log items – no download required.

Skills and Technologies

HTML, CSS, LESS, SCSS, PHP, Javascript, Ruby, Rails, Command line, SQL, Postgres, Git, APIs, TDD, responsive frameworks, Sketch, Adobe CC, Vagrant.

Education

Bachelor of Arts Communication Studies

Kent State University

August 2008 – August 2012
