Gary Bunofsky   Résumé

Introduction

My name is Gary Bunofsky. I'm a designer and developer with a love for systems, typography and applications. I enjoy designing user interfaces and writing clean, sustainable code.

Professional Experience

EmployStream, Software Developer

November 2015 – Present

EmployStream is a SaaS that automates the hiring process. I work with a team of developers to continuously integrate features into our codebase. I'm currently focused on enhancing user experience and on-boarding.

Fathom, Web Developer

November 2014 – October 2015

Designed and developed high-traffic websites for universities and academic institutions. The primary goal was to convert visitors. Worked closely with clients and marketing specialists.

Web Machine, Designer & Co-Founder

August 2012 – Present

We use an Agile approach to build and maintain web solutions. These range from website and brand redesigns to SalesForce migrations.

American Red Cross, Design Intern

May 2011 – August 2011

I designed marketing collateral. I also coded and launched targeted email campaigns.

Kent State University, Designer

January 2010 – May 2012

During my time at Kent State I worked closely with project managers to design web and print advertisements for clients.

Projects

Magenda magenda.co

I wanted to create a to-do app with no download required. Thus, I developed Magenda, a browser-based list builder.

WSM iswestsidemarketopen.com

Remembering West Side Market's hours is difficult. Therefore, I helped write iswestsidemarketopen.com.

Pass.js garybunofsky.github.io/pass.js

I wrote Pass.js to help analyze conversion funnels. Pass captures URL parameters such as utm_source through hidden form fields. It's very small and easy to install.

Skills and Technologies

Design with a focus on applications, typography and systems; proficient in HTML, CSS, PHP, Ruby, Rails, and Javascript; working knowledge of Angular; front-end development; SQL and Postgres; Bash; SCSS architecture; oAuth; API integrations; Git SCM; Sketch; web-to-lead forms; WordPress; responsive frameworks; Adobe; Vagrant; Google Analytics Certified.

Education
