EXPERIENCE

Marketplace Strategy, Freelance Developer

JUL 2017 - PRESENT | Cleveland & remote   `React, Rails, Node.js`

I built an app that tracks Amazon prices, content and other data to increase sales. I designed an activity feature to optimize product changes. I created an automated email campaign to notify employees if a product is unavailable.

University Tees, Software Developer

OCT 2018 - MAR 2020 | Cleveland & remote   `React, Rails, Angular`

I led feature life-cycles: from idea, to iteration, to deployment. I developed a job time calculator that increased production output. Similarly, I increased output by integrating the customer-facing and production apps. I also built a calendar to view planned work and aid with job scheduling.

Thinkful, Design Mentor

NOV 2016 2016 - APR 2019 | NYC & remote   `JavaScript, SCSS, HTML`

I was a one-on-one mentor for students in the JavaScript and UX courses. I helped students learn through examples, assignments and encouragement.

Web Machine, Developer & Co-founder

SEP 2012 - NOV 2017 | Cleveland & remote   `JavaScript, PHP, SCSS`

Designed, developed, and launched custom WordPress websites.

EmployStream, Software Developer

SEP 2015 - JUL 2017 | Cleveland & remote   `JavaScript, PHP, SCSS`

I developed an automated email campaign to send similar jobs to applicants. I met with and on-boarded new customers. Worked support and fixed bugs.

Fathom Marketing, Web Developer

SEP 2014 - SEP 2015 | Cleveland & remote   `JavaScript, PHP`

Worked closely with companies like CVS Pharmacy and Indiana University to develop high-traffic PPC websites.
